

Recipe for Gloop

Resources

Cornflour

Water

Tray

Apron

In a small tray empty a box of cornflour.

Using a jug pour small amounts of water on to the cornflour.

With a spoon or fingers mix until a stiff consistency is reached.

To Play

With spoons or fingers you can scoop up the gloop and watch and feel changes to the texture. Less water enables the gloop to be handled in clumps.

It is messy but washes out easily.
